Homework 6

Scenario:

You are teaching me the subject of Software Define Networks (SDN's) and have created a power point presentation. Assume I know nothing about SDN's and you are presenting this subject to me on that basis.

Requirements:

Minimum amount of slides 6 to a max of 10 (6-10) with the first slide as a title slide with name and the last slide for any sources you used for your presentation. The title and sources slides are considered into the total amount. Except for the first and last slide, each slide must contain a <u>minimum of 4 bullet points</u> however, you are allowed one (1) slide for a diagram but you must describe what is in the diagram on another slide either before or after the diagram. Another slide must include an SDN product with bullet points describing how the product is used. **Please do not go over the slide limit or your will be marked points.**

Expectation:

Use the book as a guide. Please make sure grammar is as correct as possible, make sure you meet slide requirements, and be as effective as you can in communicating the subject of SDN's.

Deliverables:

- You will need to export the slides to a .pdf file when done and turn in that .pdf file.

- The name for the .pdf file should be the first letter of your first name with your full last name and the naming convention Homework 6.
    - For example, the person with the name John Smith will name their assignment jsmithHomework6.pdf.
